

## Reminders

Your first data entry activity should be to enter figures into Arm 3: Initial search. This form can be completed as soon as your invitations have been sent out. Please complete this form as soon as you can, if you have not already. If you are having any problems with the search or sending invitations, please let us know!

Please ensure that *all* patient responses are entered into Arm 2: Screening, even if the patient has responded 'no' or turns out to be ineligible. These responses will provide very important oversight data for us so we greatly appreciate your entering it.

If you have sent your invitations and received very few responses, please consider sending another invitation via Accurx. We cannot, unfortunately, cover the cost for this, but just one participant randomised will outweigh the cost incurred!

On that note, when you are preparing an invoice to send to us, can you please first send an email stating the participants to be claimed for and total amount? We can then provide a PO number to you which must be present on the invoice, once submitted, in order to be paid. We understand there have been delays in payments and confusion with the process (for us, too!), which we apologise sincerely for, but this should help the efficiency of getting your money to you!

## Site and Recruitment Update

### Randomised Participants:

257

### Sites open:

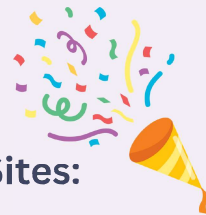

79
